Excellent Traction: Coin-Grip offers excellent traction through its rubber coin top stud protrusions. Moreover, the natural high coefficient of friction found in this rubber adds to the grip, reducing the risk of falls. The embossed coin pattern is designed for medium to high traffic areas where added traction is needed, and thus ensured with the raised studded surface.

Modern Design: This modern sleek low-profile and non-directional look makes the Coin-Grip an excellent choice in rubber flooring. In commercial applications where surface traction from a multi-directional and easy to move flooring is required, the Coin-Grip is an excellent aesthetic choice.

Temporary Installations: For temporary type fixtures, either the 6mm or 3mm Coin-Grip is recommended. A 10ft length of the 6mm Coin-Grip weighs almost 75lbs; therefore this product is generally heavy enough to stay down under its own weight.

Textured Base: The fabric base finish ads subsurface traction, keeping the runner's bottom surface secure to the floor, even when adhesive is not present.

Custom Cuts: Coin-Grip can be purchased in any length, up to 50 continuous feet, in half-foot increments. Being a sheet good, it can be custom die, laser, or water jet cut to match any dimension or size required. It could also be easily cut using a sharp utility knife on location to meet any dimensional requirement.

Cleaning: Since this product offers moderate chemical resistance, it can be cleaned with most common household cleaners. Strong, highly caustic cleaning solutions (e.g. bleach) are not recommended.

Availability: Coin-Grip is always in stock and will generally ship the same day (allow 24-48 hours for custom cut lengths).

Full Rolls	1-4 rolls	5-19 rolls	20-49 rolls	50+ rolls	In stock
3mm x 48" x 50ft	\$330.00	\$305.25	\$288.75	\$272.25	Yes
