Unmatched Durability: The Eco-Sport Tiles are designed to withstand the most abrasive conditions. This product is specifically designed and manufactured for durability.

Resilience: The ample gauge of the Eco-Sport Tiles further enhances anti-Fatigue qualities found naturally in rubber. Each tile is fabricated from thousands of rubber granules and offers superior underfoot comfort and resilience to cushion the shock from running, exercising, walking and standing.

Permanent Installations: Eco-Sport Tiles can be permanently adhered to a hard subsurface using CX-941 Adhesive. Installation instructions and sub-surface preparation are available upon request or can be accessed online.

Temporary Installations: An interlocking mechanism (plastic connector pin) is available for the 1" Eco-Sport Tiles. The Connector Pins are 3" long, made of hard black plastic with ferruled edges, which hold them in place inside the tile once they have been inserted. The 1" Eco-Sport Tile has three (3) holes on each of the four (4) sides of the tile. This allows for quick and easy installation.

Indoor / Outdoor: The high content of EPDM, which is a UV stable elastomer in the Eco-Sport Tiles, makes the product an indoor and outdoor mat.

Cleaning: This product can be cleaned using any everyday household cleansers or cleaning implements. Indoor cleaning involves a broom, damp mop, or a vacuum cleaner. For outdoor cleaning, a water hose, leaf blower or broom is sufficient. If desired a mild detergent can be used to sanitize the surface.

Recycled Products: This product is made from recycled tires. Waste tires!!! Over one quarter of them currently end up in land fills. What better idea could possibly exist than converting these same old spent rubber tires into a surfacing product to beautify your floors!

Product	1-49 tiles	50-249 tiles	250-499 tiles	500+ tiles	In stock
