**Rubber-Cal Inc. is proud to introduce a new product to its current line of rubber floor mat options: Bubble-Top Anti-Fatigue Mats.**

Santa Ana, Calif., April 3, 2009 - Rubber-Cal Inc. is proud to introduce a new product to its current line of rubber floor mat options: Bubble-Top Anti-Fatigue Mats.

The Bubble-Top Anti-Fatigue Mat has a long life and excellent anti-fatigue properties. The mats are produced from natural rubber, giving them an extensive operational life. Furthermore, natural rubber gives the mats a high coefficient of friction, forming a strong grip to the sub-surface and guaranteeing a stable surface for those walking on top.

The construction of the Bubble-Top Anti-Fatigue Mats ensures that it is both comfortable and aesthetically pleasing. The Bubble-Top Anti-Fatigue Mats are formed from domed rubber “bubbles” surrounded by a colored beveled edge. The rubber bubbles compress gently under weight, giving the mat its anti-fatigue properties. The bubbles also create channels for liquids to flow off the mat, ensuring safety. Furthermore, because the bubbles are made from natural rubber, they will outlast other sponge or foam anti-fatigue options. The colorful beveled edge, available in black, blue, red, brown, and yellow, clearly outlines the mat and creates a ramp, reducing tripping and creating cart and wheeled equipment access on all four sides of the mat.

Bubble-Top Mats are also easy to maintain. Because Bubble-Top Mats are moderately chemically resistant, they can be cleaned with most household products including soap and water. Bubble-Top is perfect for industrial or residential work areas where it can be simply hosed-off.

The Bubble-Top Anti-Fatigue Mat can be used in a number of applications. Bubble-Top Mats are available in every color, in pre-cut sizes including 14mm X 3 ft. X 2 ft. or 14 mm X 3 ft. X 4 ft. and interlocking tiles measuring 14mm X 3 ft. X 4 ft. Because of its excellent anti-fatigue qualities, long life, aesthetic attributes, and customizable surface area, the Bubble-Top Mat is a great option for a number of applications including Anti-Fatigue, Assembly Lines, Bars, Bathrooms, Car Washes, Cashier Stands, Guard Stands, Ice Skating Rinks, Industrial Anti-Fatigue, Kitchens, Laundry Rooms, Slip Resistance, and Warehouses.
