

Elephant Bark

Specifications
August 2023

<u>Description:</u>	A rolled rubber flooring product made from 100% recycled rubber. This rubber roll flooring is available in 3 thicknesses to satisfy any commercial or residential application or budget. Elephant Bark provides excellent UV protection due to its high content of EPDM, making this matting excellent for indoor and outdoor purposes.
<u>Material:</u>	83% Post-Consumer Recycled Rubber Content

<u>Applications:</u>	Airports, Animal Care Facilities, Anti-Fatigue Flooring, Art Studios, Assembly Lines, Barns, Baseball Dugouts, Boat Rubber Flooring, Break Rooms, Clubhouses, Commercial Vehicles, Dance Floors, Daycares, Doggie Day Care, Dog Kennels, Elevators, Exercise Flooring, Farm Facilities, Fitness Mat, Floor Protector Mats, Flooring for a Basement, Garage Floor Coverings, Golf Course, Gym Equipment Mat, Gym Rubber Flooring, Horse Trailer Floor, Health Clubs, Home Gyms, Hotel Lobbies, Ice Rinks, Industrial Rubber Floor, Kid Rooms, Locker Rooms, Movie Sets, Music Studios, Non-Slip Flooring, Outdoor Flooring, Pet Care, Play Areas, Rubber Mats for Dogs, Safety Surfacing, Shelf Lining, Sound Proofing, Spike Protection, Sport Equipment, Stalls, Stock Rooms, Treadmill Mat, Trailer Rubber Mats, Weight Rooms, Workout Mat, Yoga.
<u>Unmatched Durability:</u>	Elephant Bark Rubber Flooring is designed to withstand the most abrasive conditions. It is designed for heavy-duty commercial applications as it is made from recycled rubber. This product is specifically designed and manufactured with durability in mind.
<u>Resilience:</u>	Anti-Fatigue qualities found naturally in rubber are further enhanced by a space age polymer binder used during manufacturing of this product. Each mat is fabricated from thousands of rubber granules and is so resilient that it is the commercial rubber flooring of choice in most gyms. This rubber floor is durable and tough!
<u>Permanent installations:</u>	Elephant Bark Rubber Flooring can be permanently adhered to a hard subsurface using Chemrex® CX-941 Adhesive.
<u>Temporary Installations:</u>	This rubberized flooring is generally heavy enough where its own weight will keep the roll on the ground. A 10ft length of 3/8 inch weighs about 80lbs. In order to keep the edges and entry points from being a trip hazard, double sided carpet tape can be used for a quick uniform and level installation.
<u>Indoor/Outdoor:</u>	The high content of EPDM, a UV stable elastomer, in Elephant Bark makes this product ideal for indoor and outdoor applications.

Cleaning:

This product can be cleaned using any everyday household cleansers or cleaning implements. Indoor cleaning involves a broom, damp mop, or a vacuum. For outdoor cleaning a water hose, leaf blower, or broom is sufficient. If desired, a mild detergent can be used to sanitize the surface.

Sustainable Floor:

This product is made from recycled waste tires!!! Over one quarter of these currently end up in landfills. What better idea could possibly exist than converting these same spent rubber tires into a surfacing product to beautify your floors?

Custom Cuts:

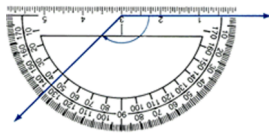

Elephant Bark can be purchased in any length up to 50 continuous feet in half-foot increments. It is available in 48 inch widths but the length is a function of your needs and requirements. We will custom-cut this rubber floor to fit your specifications.

Availability:

Elephant Bark rubber flooring rolls are always in stock and will generally ship within 24 hours.
