

Revolution Diamond-Plate

Specifications
August 2023

Description:

Revolution Diamond-Plate is a rubber mat designed after the ubiquitous industrial metal flooring. The 3ft by 3ft interlocking rubber tiles are molded from reclaimed and natural rubbers making for an elastic, comfortable, and sustainable product. Revolution rubber flooring is ideal for a wide variety of uses like: trade show booths, home gyms, commercial aerobic rooms, industrial anti-fatigue floors, and pet-care applications. Revolution Diamond-Plate jazzes up any dull facility with its “blue collar” appeal!

Material

NR (Natural Rubber), Reclaimed Rubber

Thickness:

1/2"-inch (12mm)

Sizes:

36 inch x 36 inch, 14lbs.

Animal Care Facilities, Anti-Fatigue Flooring, Art Studios, Assembly Lines, Barns, Basement Tile Floor, Boats, Break Rooms, Clubhouses, Cushion Mats, Dance Floors, Daycares, Doggie Day Care, Eco-Tiles, Elevators, Exercise Floors, Farm Facilities, Floor Protection, Garage Tile, Gym Exercise Mats, Health Clubs, Hotel Lobbies, Gym Mat, Ice Rinks, Industrial Anti-Fatigue Floor Mats, Interlocking Tile flooring, Kennel Mat, Kid Rooms, Locker Rooms, Mats for the Kitchen, Modular Floor, Movie Sets, Music Studios, Non-Slip Rubber Mat, Pet Care, Play Areas, Playgrounds, Reclaimed Flooring, Safety Surfaces, Shelf Lining, Sound Proofing, Soft Tile, Sport Equipment, Standing Mat, Stock Rooms, Thick Exercise Mat.

Installation:

Simplicity of installation makes this mat inexpensive and hassle free! Why pay an installer when this rubber floor can be set up in just a few minutes with no seams? Why use glue or adhesives with their unpleasant odors and messy characteristics? The Revolution Diamond-Plate is interlocking rubber flooring that can be installed with its ramped edges for a completed look by almost anyone!

Comfort:

Choose this rubber floor tile when you are looking for a comfortable and cushioned rubber flooring product. Finding floor protection mats or anti-fatigue mats is easy, but finding a product that combines both is uncommon. Revolution Diamond-Plate is comfortable while also offering good floor protection; this makes it ideal for home gyms!

Diamond-Plate:

Diamond plate, also known as checker plate, is usually metal stock with a surface texture of raised diamonds or lines on one side and is usually made of steel, stainless steel, or aluminum hard floor surfaces. Revolution Diamond-Plate matting is soft and elastic and though it imitates the hard steel flooring commonly thought of, it actually offers bounce-back and cushion which are inherent qualities of the rubber it is made from. Since most minds conjure the design as something hard, tough, and rigid, this flooring will surprise those who traverse it for the first time.

Cleaning:

This rubber mat can be cleaned with most mild detergents and is completely unfazed by moisture. Though it should not be exposed to strong cleaning solutions (e.g. bleach) and oily petroleum products.

Availability:

The Revolution Diamond-Plate is stocked in large quantities and will generally ship within 24 hours.
