

Corrugated Rubber Matting (Fine Rib)

Specifications
August 2021

Description:

Our Fine Rib corrugated rubber flooring offers excellent traction due to its grooved surface design. The fine rib and ridged surface pattern is more prone to scraping and offers added grip for applications where dirt and moisture are prevalent. The Fine Ribbed corrugated mat is also ideal for floor protection and safety in commercial and industrial quarters. We also suggest this mat for wet and slippery outdoor areas where added toehold and footing is a must and a long doormat is required.

Material:

100% SBR

Width:

36 inch or 48 inch

Length:

50ft rolls, Custom lengths up to 50 continuous feet are available upon request.

Thickness:

3mm or 0.12 inches (just under 1/8 inch)

Weight:

0.9 lbs per square foot

Hardness:

60 Shore A Nominal

Compression:

36% @ 50 PSI

Tensile Strength:

600 PSI

Available Colors:

Black

Applications:

Airports, Anti-Slip Protection, Balcony Floor Surfacing, Buses, Campsite Walkways, Catered Events, Commercial Vehicles, Concert Staging, Construction Sites, Commercial Entrance Mat, Deck Flooring, Dog Friendly Flooring, Fishing Boats, Garage Floor Mat, Golf Courses, Horse Trailer Mat, Hotels, Indoor/Outdoor Aisle Ways, Industrial Shelves, Long Doormat, Medical Buildings, Movie Sets, Office Buildings, Outdoor Doormats, Party Rental Companies, Patio Floor Mats, Scraper Mats, Shelf Liners, Shop Matting, Skating Rinks, Spike Proof Applications, Storage Rooms, Toolbox Liners, Trailer Floor Covering, Van Rubber Flooring, Vibration Control, Warehouses, Wet Areas, Work Areas.

Custom Parts:

This rubber floor can be cut into any two dimensional shape that your application demands.

Need rubber parts with a surface texture to cover equipment, machinery, or running boards?

Fine-Rib corrugated rubber is an excellent choice.

Permanent Installations:

The Fine Rib Corrugated rubber mat can be installed on wood or concrete surfaces with

Chemrex® CX-941, a polyurethane based adhesive.

Temporary Installations:

For temporary events, this rubber runner can be held in place with double-sided carpet tape. The tape can be applied to the edges and entryways and is an excellent and assertive means to hold the runner down. Since double-sided tapes offer excellent semi-permanent adhesion we suggest this method over any permanent glue.

Textured Sub-Surface:

The textured fabric finish on the subsurface of this rubber mat adds extra grip in temporary uses where neither permanent adhesives nor semi-permanent double sided tapes are being used.

Modular Flooring:

The Fine Rib Corrugated rubber is lightweight and is used in functions which require ease of mobility. The runner is light enough that it can be packed up and stored away for later use. For large institutions and commercial facilities, this is a great safety mat to keep in storage and use when wet weather may pose safety hazards indoor or outdoor.

Custom Cuts:

This runner is offered in 36 inch and 48 inch widths and can be purchased in any length in half-foot increments up to 50 continuous feet in either dimension. Let us know what you need and we will provide the appropriate length.

Cleaning:

The Fine Rib Corrugated rubber mat's resilient surface resists common liquids. Any common commercial or household-cleaning agents can clean the runner or it can be hosed or mopped for outdoor applications.

Availability:

The Fine Rib Corrugated Rubber is always in stock and will generally ship the same day (please allow 24-48 hours for custom cut lengths).
