

Dura-Chef Octagon

Specifications
August 2021

Description:

Where safety and comfort are of the utmost concern, this kitchen mat will serve a three-course entrée of slip-resistance, drainage and anti-fatigue properties. This robust rubber mat is made of reclaimed rubber and offers a non-slip surface even in moist or wet conditions. The octagonal drainage holes throughout the construction of the mat allow excess liquids to pass through and under the mat, away from bustling feet. Then of course, there is the design of the subsurface of the mat, which flexes and offers comfort underfoot. The Dura-Chef Octagon mat is simply the final ingredient to an efficient commercial or industrial kitchen.

Material:

Reclaimed Rubber

Size:

7/8" x 39" x 59"

Weight:

38lbs. per rubber mat

Sustainable:

Instead of piling old tires on landfills, the rubber from these tires can be reclaimed for use in a variety of products including this drainage mat. This reclaimed rubber mat delivers durability and slip-resistance and is an eco-conscious decision.

Safety:

This rubber kitchen mat is an excellent product to utilize in the dicey conditions of a commercial or industrial kitchen. The reclaimed rubber maintains a degree of slip-resistance even in wet or moist conditions. Large drainage holes keep excess liquids away from feet by draining debris and liquids under the mat and also allow it to be easily cleaned and rinsed. The mat is essential in areas prone to extended rain and snow seasons.

Comfort:

If you look on the underside of the mat, you'll find the surface covered in these little rubber protrusions. These protrusions are designed to allow the rubber mat to flex under the weight of working chefs and cooks. Thus, the mat's anti-fatigue construction reduces stress and fatigue, resulting in a more comfortable and efficient worker.

Unique Aesthetic::

The octagonal-shaped drainage holes are certainly a refreshing feature of this particular rubber mat. The kitchen mat's tough-wearing aesthetic certainly mirrors its no-frills functionality.

Cleaning:

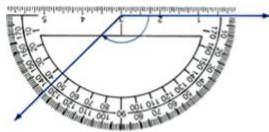

Cleaning is simple since this mat is a 100% molded rubber mat! Take the rubber matting outdoors, hose it down, leave it to dry and bring it back to to work when dried out. If grime and mud are hard to remove with water pressure, a soft brush can be used to clean the rubber mat.

Availability:

We try and stock the rubber mat in large quantities and fill orders fast! We know winter can be rough on rough on your interior floors and most orders are fulfilled within 24-hours.
