

# S-Grip PVC Runners

Specifications

August 2021

<u>Description:</u>	Made from PVC, this is a heavy-duty drainage runner with a surface that is specifically designed to capture dirt, sand, and water—while also keep them hidden underneath the mat's surface, and prevent them from entering into your home or workplace. The mat possesses excellent anti-slip qualities and can be used both indoors and outdoors.
<u>Materials:</u>	100% PVC
<u>Thickness:</u>	3/16inch
<u>Sizes:</u>	4ft x 5ft, 10lbs 4ft x 10ft, 34lbs 4ft x 25ft, 80lbs 4ft x 50ft, 160lbs
<u>Colors:</u>	Black, Blue, Gray
<u>Applications:</u>	Anti-Slip Flooring, Automobile Flooring, Commercial Doormat, Drainage Flooring, Durable Floors, Entryway Flooring, Filter Mats, Floor Cleaning System, Heavy-Duty Matting, High-Traffic Flooring, Industrial Doormat, Industrial Matting, Outdoor Matting, Scraper Mat.
<u>Keep Floors Clean:</u>	When placed at doorways or in work areas, these layered mats will trap dirt, grime, and moisture and keep them from spreading. The surface of the PVC mat scrapes the undersides of footwear and then stores collected materials beneath allowing them to maintain a clean and kept appearance.
<u>Slip Prevention:</u>	The surface of the PVC drainage mat is designed to increase traction at entryways, a very important quality during rainy or snowy-days. Simply place the mat down near doorways and the nylon-looped surface will cause friction between floors and footwear, preventing slips and falls. According to Carnegie Mellon University "Slips, trips, and falls account for 15% of all accidental deaths, second only to automobile fatalities. They are the leading cause of accidents at CMU, accounting for 30% of all reported accidents."
<u>Design and Durability:</u>	This is a fun and interesting design that will add a touch of playfulness to any space. Due to the seemingly chaotic nature of the intertwined PVC structure this is a product that will garner quite a bit of attention! PVC is a chemically stable material, which shows little change in molecular structure, and also exhibits little change in its mechanical strength.
<u>Versatility:</u>	Use this as a safety runner for both indoor and outdoor applications. Use in the commercial kitchens as a drainage Mat. Or use it to make bathroom floors anti-slip when spills take place! It can stand up to most abrasive conditions and the most demanding situations, such as high foot-traffic and harsh weather conditions.
<u>Easy Maintenance:</u>	Dust can be easily removed periodically by shaking the mat, and regular vacuuming cleaning will also keep your mat in tip-top shape. Oils and greases can be removed from within with water and common cleaners. The durability of this PVC runner allows them to be cleaned regularly with no damage done or no decreased performance.
<u>California Prop 65:</u>	 <b>WARNING:</b> Cancer and Reproductive Harm - <a href="http://www.P65Warnings.ca.gov">www.P65Warnings.ca.gov</a> .
