

“Regal” Rubber Stair Treads

Specifications
August 2021

Description:

As the name suggests, these rubber stair treads will bring a dignified touch of regality to your home. The design incorporates hallmarks of design patterns that were popular with the European royalty of yesteryear. The theme incorporates the four-pointed star with a floral border pattern, a style of design that could easily be found either at Versailles or Hampton Court. This a traction mat that can add safety to your stairs. In addition, the recycled rubber in these mats makes them a eco-friendly choice.

Installation:

These treads are some of the easiest products out there to install! Simply decide where you want to put it and then lay it down. If you want to give it extra grip, you can use double-sided adhesive tape. These are great products to take with you if you change residences often.

Traction Mat:

The excellent level of foot traction that these treads provide is perhaps their most useful feature. Rubber keeps footing secure, preventing unwanted accidents that could possibly lead to serious injuries. Add these good looking rubber treads to your home to keep your friends and family safe.

Adds Safety:

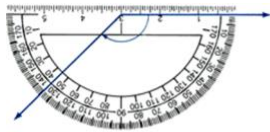

Having good traction for foot traffic goes a long way in keeping your home safe. However, these treads also have other great safety features. Not only do they protect feet, they also protect base flooring. Wood in particular is notorious for being delicate. These treads will provide the perfect layer of protection for floors against heavy weights. Also given their rubber composition, the “Regal” treads are resistant to the ill effects of excessive moisture, such as mold and cracking. To put it simply, they can take a beating from wet weather and still come out looking pretty!
